

TranspaTect

ONE THING IS CLEAR –
NO REFLECTOR NEEDED

MultiTask photoelectric sensors

SICK
Sensor Intelligence.

LESS IS MORE: TranspaTect DELIVERS COMPLETE TRANSPARENCY WITHOUT REFLECTORS

Installing a reflector is now a thing of the past, with the new TranspaTect MultiTask photoelectric sensor!

Reliability without reflectors

The TranspaTect detects transparent and semi-transparent objects as well as glossy, mirrored, or uneven surfaces reliably. Using the very latest SICK technologies, TranspaTect can detect trays and bottles without using reflectors, as existing machine parts such as panels or walls perform this role instead.

Together with the AutoAdapt feature, TranspaTect provides a cost-effective and reliable detection solution in packaging automation such as in the food and beverage and pharmaceuticals industries. Even the rugged die-cast zinc housing is ideally suited to this environment, as it is certified by Ecolab and is highly resistant to cleaning agents and disinfectants.

Convincing benefits

- **Powerful:** Reliable detection of transparent objects such as trays and bottles
- **Intelligent:** No need for troublesome reflectors. TranspaTect uses a stable, matte background as a reference surface.
- **Easy to program:** Teach-in for the reference surface at the touch of a button
- **Trustworthy:** If the background suddenly becomes contaminated, object detection will continue reliably
- **Time-saving:** No need to install a reflector or make fine adjustments to the sensor
- **Rugged:** Tried-and-tested metal housing offers protection in harsh environments, Ecolab certified

TranspaTect FOR THE FOOD AND BEVERAGE, AND PHARMACEUTICALS INDUSTRIES

Benefits for machine designers and system operators

Machine designers and system operators are living with reflector workarounds. These can be redesigning the machine to install reflectors in tight spaces. Another workaround is to require regular cleaning intervals as reflectors can be damaged or even destroyed by aggressive cleaning agents. With TranspaTect, these issues are now a thing of the past.

This innovative detection solution affords machine designers unprecedented freedom when it comes to designing machines, and as the defined reference surface is now part of the machine, this gives them a real competitive edge.

During routine production, system operators no longer have to worry about time and costs for mounting, fine adjustments, and sensor maintenance. Even process safety is increased.

Simply point the TranspaTect at a matte background such as a sheet of glassbead blasted steel and hit the teach button!

Ideal for the food and beverage, and pharmaceuticals industries

The key strength of the TranspaTect MultiTask photoelectric sensor is its ability to detect transparent packaging, such as that used for meat, cheese, and vegetables.

Typical applications include monitoring transparent trays in the inlet tunnel for tray sealers, or detecting packaged meat and cheese.

Whether it's in the beverage or pharmaceuticals industry, the TranspaTect MultiTask photoelectric sensor detects transparent and semi-transparent bottles of all shapes and sizes with the utmost reliability.

TranspaTect SEEING AND BELIEVING

Detection of transparent objects without a reflector

- Thanks to the latest SICK technology, you can now do away with reflectors completely
- Any stable, matte background, can act as the reference surface

- Benefits**
- No need for troublesome reflectors
 - Procurement and maintenance costs are minimized
 - Quick installation time

AutoAdapt

Continuous threshold adaptation from SICK, which not only readjusts the switching threshold during the course of operation, but also sets the original threshold after the cleaning process.

- Benefits:**
- Fewer machine stoppages thanks to longer cleaning intervals
 - Increased reliability and productivity

Ease of operation

- Teach-in with the touch of a button
- Highly visible status LEDs
- A precise, bright light spot thanks to PinPoint technology

- Benefits:**
- Quick commissioning
 - Rapid alignment
 - Direct optical monitoring

Rugged metal housing

- Durable die-cast zinc housing
- Resistant to vibrations and impact

Benefits:

- Outstanding reliability even under demanding application conditions
- Enhanced chemical resistance with optional Teflon coating

Ecolab certification

- Chemical resistance against cleaning agents and disinfectants

Benefit:

- Outstanding system reliability even when using aggressive cleaning agents

ONE THING IS CLEAR - NO REFLECTOR NEEDED

Product description

Thanks to new technologies from SICK, TranspaTect MultiTask photoelectric sensors are now able to detect transparent and semitransparent trays and bottles without the need for reflectors, a frequent source of errors. In these applications, the reference surface is provided by a stable matte background. Sensitivity is taught in simply by press-

ing the teach-in button. Even high-gloss, reflective, or uneven surfaces can be detected reliably. Combined with AutoAdapt, SICK's function for continuous threshold adaptation, TranspaTect sensors provide a cost-effective and reliable detection solution in packaging processes in the food and beverage, and pharmaceuticals industries.

At a glance

- High-performance SICK technology
- No reflectors required
- Existing machine parts are used as reference target
- AutoAdapt for continuous threshold adaptation in contaminated conditions
- PinPoint LED with bright and precise light spot
- Easy-to-use teach-in button
- Status LEDs visible from all sides
- Rugged metal housing (PTFE coating available on request)

Your benefits

- Reliable detection of transparent and semitransparent objects without a reflector
- Reliable detection of objects regardless of color or surface qualities
- Freedom of machine design: no mounting system for the installation of a reflector required
- Quick commissioning: there is no need to mount a reflector or precisely adjust the sensor
- High operational safety: if the background becomes contaminated, object detection will continue uninterrupted
- Machine downtime is minimized: the integrated AutoAdapt function extends the time between cleanings
- Heightened productivity: mechanical and chemical ruggedness due to the metal housing

Detailed technical data

Features

Sensor principle	Photoelectric proximity sensor
Detection principle	Foreground suppression
Dimensions (W x H x D)	15.6 mm x 48.5 mm x 42 mm
Housing design (light emission)	Rectangular
Sensing range max. ¹⁾	150 mm ... 700 mm (adjustment range background)
Sensing range ¹⁾	0 mm ... 400 mm (detection range transparent objects) ²⁾
Type of light	Visible red light
Light source ³⁾	PinPoint LED
Light spot size (distance)	Ø 8 mm (300 mm)
Wave length	660 nm
Sensitivity adjustment	Single teach-in button
Continuous threshold adaption	✓

¹⁾ Referring to the background with 90 % remission (based on glass-bead blasted stainless steel, equivalent to standard white DIN 5033)

²⁾ 0 mm ... 550 mm detection range non-transparent object.

³⁾ Average service life of 100,000 h at T_A = +25 °C.

Mechanics/electronics

Supply voltage ¹⁾	10 V DC ... 30 V DC
Ripple ²⁾	≤ 5 V _{pp}
Power consumption ³⁾	≤ 55 mA
Output type	PNP / NPN (depending on type)
Output function	Complementary
Switching mode	Light/dark-switching
Signal voltage PNP HIGH/LOW	> U _v - 2,5 V / ca. 0 V
Signal voltage NPN HIGH/LOW	Approx. V _S / < 2.5 V
Output current I_{max.}	100 mA
Response time ⁴⁾	2 ms
Switching frequency ⁵⁾	250 Hz
Connection type	Male connector, M12
Circuit protection	A ⁶⁾ C ⁷⁾ D ⁸⁾
Protection class	II
Weight	120 g
Enclosure rating	IP 66 IP 67
Ambient operating temperature	-40 °C ... +60 °C
Ambient storage temperature	-40 °C ... +75 °C

¹⁾ Limit values, operation in short-circuit protected network max. 8 A.

²⁾ May not exceed or fall short of V_S tolerances.

³⁾ Without load.

⁴⁾ Signal transit time with resistive load.

⁵⁾ With light/dark ratio 1:1.

⁶⁾ A = V_S connections reverse-polarity protected.

⁷⁾ C = interference suppression.

⁸⁾ D = outputs overcurrent and short-circuit protected.

²⁾ Adjustment range background

³⁾ Detection range transparent objects

⁴⁾ Detection range non-transparent objects

Dimensional drawings (Dimensions in mm (inch))

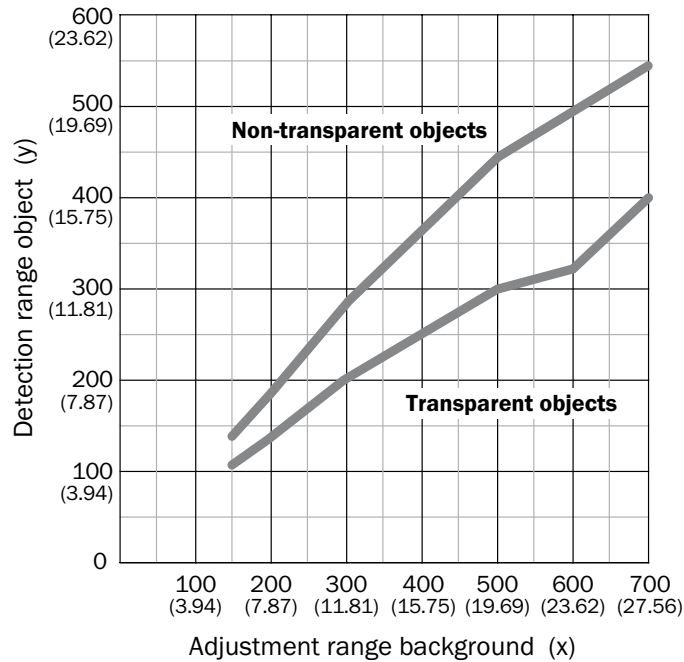

Adjustments

- ④ Status indicator LED green: power on
- ⑤ Status indicator LED, yellow: Status of received light beam
- ⑧ Adjustment sensing range: single teach button

- ① Recommended installation for the detection of transparent trays
- ② Recommended installation for the detection of transparent bottles
- ③ Optical axis, receiver
- ④ Optical axis, sender
- ⑤ Status indicator LED green: power on
- ⑥ Status indicator LED, yellow: Status of received light beam
- ⑦ M4 threaded mounting hole, 4 mm deep
- ⑧ Mounting hole, Ø 4.2 mm
- ⑨ Adjustment sensing range: single teach button
- ⑩ Connection

Characteristic curves (Dimensions in mm (inch))**Legend:**

- x: Sensing range max. in mm (adjustment range background)
= Distance sensor / background
- y: Sensing range in mm (detection range object)
= Maximum distance sensor / front edge of the object

Minimum distance sensor / background : 150 mm*

*) Referring to the background with 90 % remission equivalent to standard white DIN 5033 (i.e. glass-bead blasted stainless steel).
The use of a shiny background can increase the minimum distance to the background (i.e. brushed and pickled stainless steel, minimum distance sensor to background: 300 mm).

How to use this diagram:

Measure the distance from the sensor to the metal surface in the background.
This is the value for x (adjustment range background). If this is 500 mm for example,
the maximum distance between the sensor and the leading edge of a transparent object is 300 mm.

FOR SAFETY AND PRODUCTIVITY: SICK LIFETIME SERVICES

SICK LifeTime Services is a comprehensive set of high-quality services provided to support the entire life cycle of products and applications from system design all the way to upgrades. These services increase the safety of people, boost the productivity of machines and serve as the basis for our customers' sustainable business success.

Consulting & Design

Globally available experts for cost-effective solutions

Product & System Support

Fast and reliable, by telephone or on location

Verification & Optimization

Checks and recommendations for increased availability

Upgrade & Retrofits

Uncovers new potential for machines and systems

Training & Education

Employee qualification for increased competitiveness

SICK AT A GLANCE

SICK is a leading manufacturer of intelligent sensors and sensor solutions for factory, logistics, and process automation. With more than 6,000 employees and over 40 subsidiaries worldwide, we are always close to our customers. A unique range of products and services creates the perfect basis for controlling processes securely and efficiently, protecting individuals from accidents and preventing damage to the environment.

We have extensive experience in various industries and understand their processes and requirements. With intelligent sensors, we can deliver exactly what our customers need. In application centers in Europe, Asia and North America, system solutions are tested and optimized in accordance with customer specifications. All this makes us a reliable supplier and development partner.

Comprehensive services round out our offering: SICK LifeTime Services provide support throughout the machine life cycle and ensure safety and productivity.

For us, that is “Sensor Intelligence.”

Worldwide presence:

Australia, Belgium/Luxembourg, Brasil, Česká republika, Canada, China, Danmark, Deutschland, España, France, Great Britain, India, Israel, Italia, Japan, México, Nederland, Norge, Österreich, Polska, România, Russia, Schweiz, Singapore, Slovenija, South Africa, South Korea, Suomi, Sverige, Taiwan, Türkiye, United Arab Emirates, USA.
